○ BJP4 Self-Check 7.2: numbersElements

Language/Type:  Java [arrays](#) [syntax](#)**Author:** Marty Stepp (on 2016/09/08)

Assume that the following array has been defined, though you do not necessarily know its length.

```
int[] numbers = new int[??];
```

What expression should be used:

☒ Sound F/X

To access the first element?

To access the last element, assuming was created with length 10?

To access its last element, regardless of its length?

**Submit**

✔ You passed 3 of 3 tests.

[Go to the next problem: dataArray](#)

question #1: To access the first element?

your answer: numbers[0]

result: ✔ pass

question #2:

To access the last element, assuming was created with length 10?

your answer: numbers[9]

result: ✔ pass

question #3:

To access its last element, regardless of its length?

your answer: numbers[numbers.length - 1]

result: ✔ pass
