⚪ BJP4 Self-Check 8.3: StringObject

Language/Type:　　☕ Java Objects state Strings
Author:　　　　　Marty Stepp (on 2016/09/08)

What is the state and behavior of a String object?

☑ Sound F/X

a. ⚪ The state is the string itself, and the behavior is what you do with it, such as putting it in an array or list.
b. ⚪ The state is the location the text came from, such as a file or from the Scanner, and the behavior is when you save that string to a new location, such as to a new file.
c. ⚪ The state is methods that return values, such as length or charAt, and the behavior is methods that change the string, such as toUpperCase or substring.
d. ⦿ The state is its sequence of characters, and the behavior is its methods, such as length and indexOf.
e. ⚪ The state is the memory occupied by the object, and the behavior is what you do with that memory, such as storing characters in it.
(order shuffled)
